

## **Epiphany Form Builder Form Field Definitions**

**Form Name:** Each form must have a unique name. This will be the same for every field in your form

**Display Order:** Which position should this field be displayed in on the form. Two fields in the same form cannot have the same display order

**Field Label:** Enter what you want the customer to see identifying this field on the form.

**Field Type:** text – all normal text is accepted; number – only numeric values are accepted.

**Field Size:** How many text or number characters is the user allowed to enter?

**Intro Text:** Enter what you want the avatar to say when this field is active.

**Response Text:** Do you want the avatar to say something when the entry is completed?

**Required?:** Does the customer have to file in this field, Y or N.
